ARZINO

We Care Your Home

Stone Coated Metal Roofing Tiles

Dimensions: 1345mm (Length) x 420mm (Width).

Weight: 2.900kg per tile (Lightweight design reduces truss work costs).

Thickness: 1.8mm Total Thickness (Base sheet: 0.45mm).

Coating: AZ 200 GSM

Key Features & Layers:

- Superior Bonding
  Clear Acrylic Overglaze increases brightness, color life, and bonding strength.
- UV & Noise Protection
  Stone granules protect against UV rays and significantly reduce rain noise.
- Coastal Protection
  Features a special white under-body coating specifically designed for beach areas to prevent corrosion.
- High-Strength Core
  Built on a high-strength, stretchable steel base.

Why Choose Arzino Roofing?

Weather Security
Provides 50 years of weather security.

Hurricane Resistant
Capable of withstanding winds above 200 km/h.

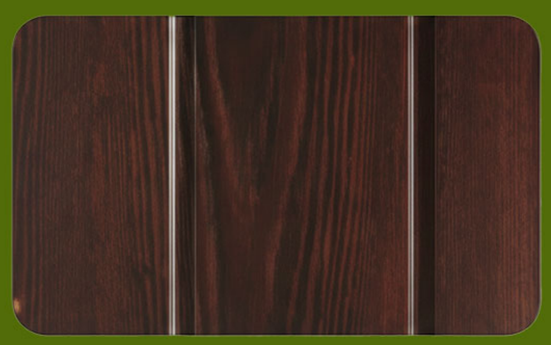

Leak Proof
Installed using a "screwed in from the bottom up" method that ensures neatness and prevents leaks.

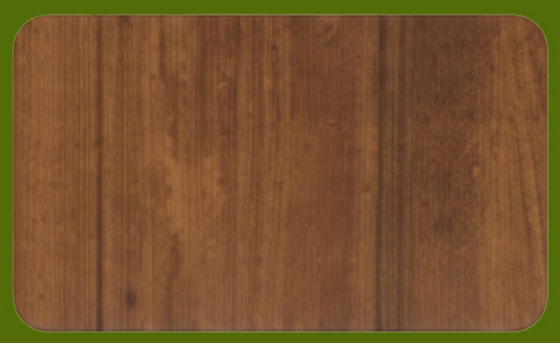

Salt & Rust Resistant
Ideal for coastal areas due to high protection against salt, humidity, and rust.

Thermal Efficiency
Glass pigmentation coating is hydrophobic and water-resistant, while the copper-coated granules help reduce heat.

Cool Ceiling Solutions

Advanced Heat & Sound Insulation Arzino Cool Ceilings are designed to replicate the aesthetic of wood while providing modern insulation benefits.

Performance Benefits

Massive Heat Reduction
3 layers of heat-resisting material reduce up to 95% of heat.

Energy Saving
Thermal insulated paint with nylon net reflects heat, lowering air conditioning energy consumption.

Leak Proof
A polyurethane foam core ensures the ceiling is soundproof, heatproof, and waterproof for enhanced comfort.

Salt & Rust Resistant
Made with powder-coated Al-Zn material that is heat-fused to the metal surface for long-lasting color.

Design & Installation

Lightweight & Safe
Metal panels are lighter than plaster or wood, reducing the structural load on your building.

Visuals
Available in Laminated Wood-like finishes including Teak Wood, Vintage Cream, Rose Pine, Silver Wood, and Vintage Teak.

Specs
16mm total thickness for durability and resistance to bending.
